

## Studio Tour

A studio space is as exciting for the creator as it is for the client. We are proud of our modest but capable in-home studio which over 8 years has served each of our production needs and grown into perfection!

On site we have a climate and sound controlled 20'x20' production space to accommodate 3-camera live production, production and set design equipment and space, a 170 sq ft dual edit suite, personal hair / makeup / changing space, and a 65" 4k cinematic screening room.
